Scaling multi-class support vector machines using inter-class confusion
 S Godbole, S Sarawagi, S Chakrabarti - SIGKDD'02
 Support vector machines (SVMs) excel at two-class discriminative learning problems. They often outperform generative classifiers, especially those that use inaccurate generative models, such as the naïve Bayes (NB) classifier. On the other hand, generative ...

Padlet

Padlet

Padlet is the easiest way to create and collaborate in the world. It works like a sheet of paper where you can put anything (images, videos, documents, text) anywhere, from any device (pcs, tablets, phones), together with anyone.
